PROFESSIONAL SUMMARY

I am a passionate backend developer with experience in building NodeJS REST APIs for mobile applications and web applications. With a lot of effort, teamwork, dedication, and investment in growth and development, I'm eager to develop more software solutions.

WORK HISTORY

Byte - Backend Developer

January, 2022 - September, 2022

- Worked on endpoints for payments, bills, requesting money, and onboarding features of the app.
- Collaborated with my team lead on architecting the backend infrastructure and systems.
- Integrated third parties for bills, payments, emails, SMS, and user verification.
- Wrote code for the backend infrastructure that is extensible and maintainable.

Byte - Software Developer Intern

September 2021 - January 2022

- I used React.js, HTML, and CSS to convert various user interface designs for the Byte website.
- I took part in cleaning up the backend codebase.

Vertigo-X - Frontend Developer

December 2021 - February 2022

- Used Angular, Ionic, and CSS to convert UI designs into app screens.
- Fixed bugs on the screens.

Zuri HNGi8 - Backend Developer Intern

August 2021 - September 2021

- Contributed to users' stories to achieve the task assigned to my team.
- Created issues on github and worked on some.
- Participated in the backend architectural design.
